FIELD CARD · SAT 10 OCT 2026 · GARDEN · AUTUMN

# 45 minutes outside

| OUT FOR | SUNSET |
|---|---|
| 45 min | 6:25 pm |

Step outside without your phone. Press your thumb an inch into the soil to test the moisture. Inspect the underside of five leaves, and weed or trim one small patch with care.

## WHAT TO DO THIS WEEK

**Garlic:** Plant cloves 2 inches deep, pointed end up, and mulch heavily.
**Winter Spinach:** Sow cold-hardy spinach seeds directly in fertile ground under a cloche.
**Kale & Collards:** Harvest outer tender leaves; light frost sweetens and tenderizes the greens.
**Spring Peas:** Direct sow sugar snap or shelling peas as soon as soil can be worked.

**SEEN NEARBY THIS MONTH:** white snakeroot, Eastern Gray Squirrel, Rock Pigeon, common mugwort, Common Eastern Bumble Bee

## NOTICE NINE THINGS

- ☐ Animal tracks in mud heading toward brush
- ☐ A clear sound with no engine or human voice in it
- ☐ The exact direction the wind is blowing against your cheek
- ☐ Bark cold on the north side of a trunk
- ☐ Soil that smells like damp cellar or rain
- ☐ Fungus shelf growing horizontal from a rotting log
- ☐ Dried seedhead that rattles when you flick it
- ☐ A natural texture you would not have guessed before touching
- ☐ A yellow or red leaf stuck in green grass

**Phone in pocket. Shoulders down. Eyes open.**
Back by 10:45 am. Tell someone where you are going.
